Nipissing Muskies

Guiding Services on Lake Nipissing's South Shore and Surrounding Area

Gord Ellis of Ontario Out of Doors Magazine with typical Lake Nipissing musky.

One of Ontario's Best Kept Secrets!

Come fish Lake Nipissing, Ontario's 4th largest inland lake ,for monster muskellunge and northern pike! Early July sees a brief flurry of trophy action as the big fish recoup from spawning. However, the real deal begins from September until October 15th when the season closes.

See our links page for recommended accommodations in the area. The city of North Bay is situated on Nipissing's North East shore and is approx. 4hrs car ride from Toronto and 5 hrs from Sault Ste. Marie. North Bay's airport receives commercial flights daily. Read about us in the June 2004 issue of Ontario Out Of Doors magazine.

Dan Colomby - esox guide

Happy client with first muskie.

Dan Colomby's passion for North Bay muskies began in 1997. Dan has been fishing Lake Nipissing for multi-species since 1989. Dan's knowledge of the local fishery, fueled by the awareness of Nipissing's trophy potential, have become an ever increasing motivation to represent and protect this fragile fishery through guiding and angler education on the water.

Dan advocates strict catch, measure, photograph and release. Special consideration may be given for world-class fish. Dan uses a 100lb IGFA approved Chatillion hand scale, specially balanced cradle, and length / girth measuring tools for special fish.
